Learn to Lead

(L to R) Western engineering PhD candidate Shafquat Rana, Western engineering and Ivey Business School professor Joshua Pearce, and Magnus Homes' president Jaime Crncich. (Steven Anderson/Western Communications). Western engineers have amalgamated the function and force of photovoltaics (PV) technology with a heat pump and a thermal battery to create a fully electrified and energy efficient new house. The end game is to eliminate the need for fossil fuels, achieving real net-zero energy consumption for homebuilders and homeowners around the world.
